I CLAIM:

1. A system of developing a personal folder via the internet of parties to whom notifications are to be sent of changes in at least one of name, address and e-mail information, comprising:

a web server and database connected to said web server, said web server receiving information over the internet from computers of users who register changes in name, address and/or e-mail information stored in the database;

a firewall server connected between said web server and said users' computers;

said web server hosting a plurality of web pages for prompting users of a procedure for changing a user's name, address and/or e-mail information at said users' computers;

means for generating a personal folder for each user in said database and for adding parties to be notified of said address change information, said means including said web server displaying a template on a user's computer for use by a user in searching for records retrieved from directories and displaying the records;

mans for selecting the displayed records as a party to be notified of the changed information input by a user and transferring said selected records to said personal folder for generating a notification list of parties to be notified of said change in a user's name, address and/or e-mail information; and

means for sending the notice of a change in a user's name, address and/or e-mail information to the parties in said notification list.

2. A system according to claim 1, wherein said web pages include a first page for prompting a user to select one of a plurality of formats that matches a user's old and new addresses, respectively, and a second web page that

corresponds to the selected formats that displays fields in which change information is entered according to said selected formats to ensure compliance in entry of change information for the selected format.

3. A system according to claim 1, further including a database of user profile information based on information entered by a user in the procedure for changing a user's name, address and/or e-mail information, including information of a user's notification list.
